

# Scientific journals and articles:

So much to read; so little time.

So, what are we looking for?

Today:

1. Scientific journals
2. The art of the title
3. Readings

## Would you read this journal:

| <u>Journal title</u>                                  | <u>Yes</u> | <u>Maybe</u> | <u>Not Likely</u> |
|-------------------------------------------------------|------------|--------------|-------------------|
| Marine Biology                                        | 8          | 6            | 1                 |
| Freshwater Biology                                    | 12         | 2            | 1                 |
| Animal Behaviour                                      | 2          | 5            | 0                 |
| Ecological Modeling                                   | 4          | 8            | 5                 |
| Ecology                                               | 11         | 2            | 2                 |
| Molecular Ecology                                     | 1          | 6            | 8                 |
| Journal of Fish Biology                               | 6          | 7            | 2                 |
| Journal of Crustacean Biology                         | 3          | 8            | 6                 |
| Journal of Fish Diseases                              | 1          | 7            | 9                 |
| Science                                               | 6          | 2            | 6                 |
| Canadian Journal of Zoology                           | 1          | 3            | 13                |
| Canadian Journal of Fisheries<br>and Aquatic Sciences | 8          | 4            | 3                 |

# Journals in which SAFS faculty published in 2002–2012

2002-2012

# The art of the title

Or, you never get a second chance  
to make a first impression.

# The art of the title

Imagine you do a study on anole biogeography.  
What is your title going to be?

# The art of the title

Imagine you do a study on anole biogeography.  
What is your title going to be?

**nature**

Letter | [Published: 24 September 2014](#)

## **Island biogeography of the Anthropocene**

[Matthew R. Helmus](#) , [D. Luke Mahler](#) & [Jonathan B. Losos](#)

[Nature](#) **513**, 543–546(2014) | [Cite this article](#)

**1221** Accesses | **96** Citations | **250** Altmetric | [Metrics](#)

# The art of the title

Imagine you do a study on anole biogeography.  
What is your title going to be?

Ecology / Volume 87, Issue sp7

Special Issue | [Free Access](#) |

## PHYLOGENETIC ANALYSIS OF THE EVOLUTION OF THE NICHE IN LIZARDS OF THE *ANOLIS SAGREI* GROUP

Jason H. Knouft, Jonathan B. Losos, Richard E. Glor, Jason J. Kolbe

# The art of the title

Imagine you do a study on anole biogeography.  
What is your title going to be?

Journal of Biogeography / Volume 38, Issue 6

ORIGINAL ARTICLE

 [Free Access](#)

**Evolutionary assembly of island faunas reverses the classic island–mainland richness difference in *Anolis* lizards**

Adam C. Algar , Jonathan B. Losos

## Class activity:

Let's now go on-line to the UW library, find a journal, open the table of contents, and look at it.

We will use the *Canadian Journal of Fisheries and Aquatic Sciences* as an example.

<http://catalog.lib.washington.edu/search~>

Let's look at the most recent issue of the journal and scan the titles. Which would you choose to read, and why? Do some words in the titles intrigue you or turn you off?

Are you looking for reference to a place such as "Alaska" or an organism such as "octopus" or a theme such as "conservation" or a discipline such as "genetics"?

### 3. The art of the title

The unspoken rules of the title:

1. Don't underestimate the power that your title can have
2. Tailor the title to your audience, which may be dictated by the choice of journal
3. Too broad, and you risk disappointing people
4. Too narrow, and you risk selling yourself short
5. When in doubt, use a title that tells the main message

Many people will *only* read the title.

What would you want those people to know?

## Assignments for today and Wednesday:

1. Choose a single journal article that speaks to you in some way. It does not have to be on the same topic as your project. This choice is very important. You will read that article closely, write about it, tease it apart, present it to the class, and in other ways make it a focal part of your experience in this course. **It will be the basis of your poster later in the course.** We will continue looking in class on Wednesday.
